I am offering for sale my R390/URR (non A). Asking price is \$625.
The receiver was manufactured by Collins Radio,
Order # 14214-PH-51-93, Serial #640. The receiver is operational (as
type this post I am listening to WCCO, 830 AM out of Minneapolis),
has no modifications, and has the top and bottom covers intact. I am
sure it could benefit from a good going over by somebody who knows
what they are doing. Digital photos emailed upon request. I will
not pack and ship as it is too heavy so pick up only from Zip code
54751. I would be willing to deliver within a 225 mile radius of my
location for the round-trip cost of gas.

Hi Todd & Gang,

To fix tube tongs that have hardened coating get a roll of
Friction Tape and wrap the tongs. Friction Tape (available by that name)
has cloth base covered by black something and is sticky on backside.
Works wonders!
FWIW

I am restoring some old ssb gear to loan out to new hams in our North
Fulton club. I am looking for a power supply for a Drake TR-3 and I can use
either an AC-3 or AC-4 supply. If you have one excess to your needs or know
of a source other than Ebay, let me know.

Hello Everyone,

Now available, is the third installment in my series on past and present Canadian anti-submarine aircraft. The Neptune P2V7 in Canadian service is the featured aircraft with emphasis on the electronics suite.

<http://jproc.ca/rrp/rrp3/neptune.html>

Previous aircraft in this series can be found at:

<http://jproc.ca/rrp/rrp3/avenger.html>

<http://jproc.ca/rrp/rrp3/argus.html>

Now working on the Fairey Firefly, the next in the series.

KWMR, the community radio station for which I'm the "Transmitter Wrangler" here in Point Reyes Station, CA is in the middle of its pledge drive. As part of that

effort I've been asked to do a special one hour episode of "Incredible Radio Tales" on Thursday 9/24 starting at 8:30pm pdt. The show will deal with the mystery, magic and majesty of radio across the entire electromagnetic spectrum. The MRHS and the reason the project is important will be part of the second half of the show. If you're within range of the station tune in to 90.5MHz or 89.9MHz. If you're not you can listen on-line at:

http://kwmr.org/listen_kwmr.html

Subject: ***SPAM*** FS: HALLICRAFTERS SX25 "SUPER DEFIANT"
Date: Sun, 20 Sep 2009 15:36:22 -0500
MIME-Version: 1.0
Content-Type: text/plain;
 format=flowed;
 charset="iso-8859-1";
 reply-type=original
Content-Transfer-Encoding: 7bit

FS: HALLICRAFTERS SX25 "SUPER DEFIANT" communications receiver, 0.54-42 MHz, with speaker, good condition, \$100.00 O.B.O.

I'm helping a friend-of-a-friend find a good home for this cool receiver. I have no stakes in it myself, other than to help the owner link up with a boat anchor collector who will give this fine receiver some T.L.C., operate it, enjoy it, and keep it in his collection. The seller received it from the original purchaser, an engineer, now sk. He does not want to see this unit resold on the auction sites for a profit. If you can respect these wishes, please read on.

This is an art deco style Hallicrafters SX-25 with matching speaker (might be the PM-23?). The case of the receiver and speaker have no metal dents,

etc. They have virtually no damage to the paint but show the normal dirt, etc., of a fifty year old radio. There are some rather minor cabinet flaws which are evident in the photos. Inside and outside the radio would benefit from a going over with 409 cleaner. The main tuning dial cord is broken but present. Has all original knobs. The output transformer has been replaced with a Stancor A3880, which we believe is the correct replacement impedance and power value. The receiver has hum, but receives strong stations in the BC band and also 80 meter ham band. The speaker has a 5000 ohm to 8 Ohm transformer and its voice coil is good. The plastic in the dials has discolored over time but would be replaceable. The receiver has had the line cord replaced with a 3 wire grounded cord. Other than the above, we don't know anything else about it, but it appears to be in nice shape.

The receiver is not in my possession, so I am the middle-man for the descriptions & photos. If you are interested, please email me off-list and I will send you photos and what other info I have. The seller STRONGLY desires that this unit be picked up (Kansas City area), however professional packing + shipping + insurance are options. If you've done this before you can probably estimate the costs. The weight, unpacked, is about 46 pounds for the receiver, and about 20 pounds for the speaker. If you wish to purchase the unit I will put you in touch with the seller, and you can work out your own arrangements. Payment by USPS money order (sorry, no PayPal or other electronic means).

Everything described here is as accurate info as we can provide, ditto the photos, however unit is offered as-is.

Please let us know if you have any interest!

Thanks and 73,

Dan

the
original purchaser, an engineer, now SK. He does not want to see this =
unit
resold on the auction sites for a profit. If you can respect these =
wishes,
please read on.

This is overall a relatively clean National NC173. The case of the =
receiver
has no metal dents, but has some rust (?) or mold/fungus (?) which =
seems to
clean up pretty well with 409 cleaner. Inside, it looks dusty but =
relatively
clean. It has been tested and receives WWV on 5 Mhz. The receiver has =
had
the line cord replaced with a 3 wire grounded cord. Has all original =
knobs.
We are unaware of other mods, repairs, etc. Other than the above, we =
don't
know anything else about it, but it appears to be in relatively nice =
shape.

The receiver is not in my possession, so I am the middle-man for the
descriptions & photos. If you are interested, please email me off-list =
and I
will send you photos and what other info I have. The seller STRONGLY =
desires
that this unit be picked up (Kansas City area), however professional =

packing
+ shipping + insurance are options. If you've done this before you can
probably estimate the costs. The weight, unpacked, is about 50 pounds. =
If
you wish to purchase the unit I will put you in touch with the seller, =
and
you can work out your own arrangements. Payment by USPS money order =
(sorry,
no PayPal or other electronic means).

Everything described here is as accurate info as we can provide, ditto =
the
photos, however unit is offered as-is.

Please let us know if you have any interest!

Here's a HV power supply which may be useful for those of you working to =
get
an old teransmitter or amplifier on the air.

FS: MOTOROLA HIGH-POWER (1500VDC) MICOR POWER SUPPLY, clean, working, =
good
condition, \$50 O.B.O.

I'm helping a friend-of-a-friend find a good home for this monster power
supply. I have no stakes in it myself, other than to help the owner link =
up
with someone who needs a quality, functioning, high-voltage power =
supply.
Just the transformer, choke, and capacitors are worth the purchase =
price!

This is clean Motorola TLN5699A power supply, part of the 375W (OUTPUT!) =
VHF
base station/repeater. The output voltage is +1500 VDC at 400 mA (500 ma
could be drawn ICS), +300 v, -50 v and the weight is about 90 pounds. A
7-page copy of the schematics and manual data will be provided with the
power supply. This unit was recently removed from service, in operating
condition. There are no modifications to this unit and it will be bench
checked before shipping.

The power supply is not in my possession, so I am the middle-man for the =
the
descriptions & photos. If you are interested, please email me off-list =
and I
will send you photos and what other info I have. The seller STRONGLY =
desires
that this unit be picked up (Kansas City area), however professional =
packing
+ shipping + insurance are options. The power supply is HEAVY!!! We =
estimate

\$40 to build a crate, plus add freight charges and insurance. If you =
wish
to purchase the unit I will put you in touch with the ths seller, and =
you
can work out your own arrangements. Payment by USPS money order (sorry, =
no
PayPal or other electronic means).

Everything described here is as accurate info as we can provide, ditto =
the
photos, however unit is offered as-is.

Please let us know if you have any interest!

Thanks and 73,

Dan

Attention K0DAN...
You might want to use lower case in your subject line.

All upper case in the subject line triggers my SPAM filter, which prints "***SPAM***" in front of your subject. The email goes through, but it's tagged as "spam". Some filters on other computer systems might delete or redirect your message to an alternate folder.

Just a friendly caution.

Ed, VA3ES

Well, I'm venturing into high power AM.
Got ahold of a Globe 500C and will need some help in restoration and parts. Can anyone point me in a direction for some photos/help/mods/updates to the old girl?

Here's a HV power supply which may be useful for those of you working to get an old teransmitter or amplifier on the air.

FS: MOTOROLA HIGH-POWER (1500VDC) MICOR POWER SUPPLY, clean, working, good condition, \$50 O.B.O.

I'm helping a friend-of-a-friend find a good home for this monster power supply. I have no stakes in it myself, other than to help the owner link up with someone who needs a quality, functioning, high-voltage power supply. Just the transformer, choke, and capacitors are worth the purchase price!

This is clean Motorola TLN5699A power supply, part of the 375W (OUTPUT!) VHF base station/repeater. The output voltage is +1500 VDC at 400 mA (500 ma could be drawn ICS), +300 v, -50 v and the weight is about 90 pounds. A 7-page copy of the schematics and manual data will be provided with the power supply. This unit was recently removed from service, in operating condition. There are no modifications to this unit and it will be bench checked before shipping.

The power supply is not in my possession, so I am the middle-man for the the descriptions & photos. If you are interested, please email me off-list and I will send you photos and what other info I have. The seller STRONGLY desires that this unit be picked up (Kansas City area), however professional packing + shipping + insurance are options. The power supply is HEAVY!!! We estimate \$40 to build a crate, plus add freight charges and insurance. If you wish to purchase the unit I will put you in touch with the ths seller, and you can work out your own arrangements. Payment by USPS money order (sorry, no PayPal or other electronic means).

Everything described here is as accurate info as we can provide, ditto the photos, however unit is offered as-is.

Please let us know if you have any interest!

Thanks and 73,

Dan
